Styling with Cascading Styles Sheets

Rajani S

Department of Computer Applications

1. Write a html code for the following output using ID Selector

Chapter 1 Introduction

1.1 The Basics of Computer Networks

If a job is worth doing, it's worth doing right.

Two wrongs don't make a right, but they certainly can get you in a lot of trouble.

The last class definition in style specs is taken when no winner

2. Apply Inline CSS for the following output.

If a job is worth doing, it's worth doing right.

`Two wrongs don't make a right, but they certainly can get you in a lot of trouble.`

Chapter 1 Introduction

1.1 The Basics of Computer Networks

3. Apply document level CSS and class selector to get the following output.
