The **<font>** tag was used in **HTML 4** to specify the font face(type), font size, and color of text.

It is not supported by HTML 5.

**How to use it ??**

#### Example 1:

```
<p style="color:red">This is a paragraph.</p>
<p style="color:blue">This is another paragraph.</p>
```

#### Example 2:

```
<p style="font-family:verdana">This is a paragraph.</p>
<p style="font-family:'Courier New'">This is another paragraph.</p>
```

#### Example 2:

```
<p style="font-family: Arial; font-size: 18px; color: blue;">
```

This is styled using CSS.

```
</p>
```

- Marquee tag is one of the important tags introduced in HTML.
- The <marquee> tag is a container tag of HTML.
- It is implemented for creating scrollable text or images within a web page from either left to right or top to bottom.

This tag has been deprecated in the new version of HTML, i.e.,  
HTML 5.

- The different attributes of <marquee> tag are:
  - 1) **width:** provides the width or breadth of a marquee.  
For example width="10" or width="20%".
  - 2) **height:** provides the height or length of a marquee.  
For example height="20" or height="30%".
  - 3) **direction:** Direction in which it will scroll- left, right, up, or down
  - 4) **loop:** provides how many times the marquee will loop

## Web Design

### Marquee Tag

---

- The different attributes of <marquee> tag are:
  - 5) **scrollamount:** provides value for speeding the marquee feature.
  - 6) **behavior:** provides the scrolling type in a marquee.  
That scrolling can be like sliding or scrolling

## Web Design

### Marquee Tag

Example:

```
<html>
```

```
  <title> Example for HTML Marquee Tag </title>
  <body>
    <marquee width="40%" direction="up" height="200px"
loop="2">
```
